

DS Smith Nature's Basket

DS Smith Nature's Basket Top-Seal is a range of fiber based punnets designed for fresh fruit and vegetables. Compatible with top seal applications, it helps reduce plastic while maintaining protection, quality and presentation.

This solution is designed for producers and retailers looking for alternatives to plastic packaging without sacrificing industrial performance. Nature's Basket combines a rigid, lightweight structure with optional barrier properties enabled by recycling-compatible technologies, while offering a wide range of design options.

Sustainability and plastic reduction

Made with renewable fiber, Nature's Basket punnets are designed to meet the goals of plastic reduction and circular economy.

They are recyclable and easily integrated into paper recycling pools. They can also incorporate moisture barrier technologies, helping to reduce the use of plastic in demanding applications

- Fiber based produced
- Recyclable and compatible with paper recycling systems
- Moisture barrier for very demanding environments
- Lightweight and resistant solutions

Industrial Compatibility and Efficiency

The punnets can be delivered assembled or flat, which allows them to be adapted to different packaging processes.

Our top-seal design is compatible with existing production lines. They can also be assembled with standard erecting machines, and their die-cut shape is optimized for efficient stacking and transport

- Easy integration into existing top seal lines
- Compatible with current films and sealing machines
- Can be delivered assembled or flat
- Assembly using standard erecting machines

Protection and branding

The F-flute design offers rigidity and strength to protect fresh produce, with ventilation and humidity adaptations depending on the product category.

In addition, its larger printable surface facilitates brand communication, shelf presentation and impact at the point of sale, with a natural finish and high-quality premium printing options.

- Excellent rigidity to protect fresh products
- Validated on products with high moisture content
- Adaptation to ventilation and humidity needs
- Larger printable surface to reinforce brand image
